

## Sprint Review 5

- Features implemented: this week we updated page navigation, however most of our time was spent testing
- Issues fixed: N/A
- Implementation review (*What went well in the implementation, what problems occurred, how problems were solved*): This week we weren't able to implement as many features as we would have liked. Unfortunately, a lot of our time was dedicated to testing which we weren't altogether too familiar with.
- Changes made: Front end design made to look more thematic and user friendly
- Plans for next sprint (*What will be done for the next sprint*): For our next sprint we want to just work on implementing as user story features as we can.
- Scrum Review (*What went well in Scrum, what could be improved, and what changes will be made*): Communication and assigning of tasks went well, changes to UX will be made in the future and user story implementation will be our priority
